

The Lab

Harvard University

The Lab at Harvard is a new forum and platform for idea experimentation in the arts and sciences at Harvard University.

This year The Lab debuts as a part of the [Harvard School of Engineering and Applied Sciences](#), and continues to work to break down boundaries between the arts and sciences to accelerate learning. We catalyze the development of Harvard student and faculty ideas through work-in-progress exhibits, monthly Idea Nights, and annual experiments between leading international artists and Harvard University scientists.

The Lab is principally an exhibition and meeting space for student idea development within and between the arts and sciences, and serve as a forum for interfaculty and public creative expression and dialog.
