

## **The Center for Mathematics and Quantitative Education at Dartmouth**

**An interdisciplinary approach to teaching maths through the humanities, philosophy and the arts**

**funded by an NSF grant.**

**Professor Dorothy Wallace.**

### *Description*

The electronic bookshelf contains course readers, lesson plans, and fully developed lessons that feature an interdisciplinary approach to a mathematical topic. The site contains several syllabi of courses taught at Dartmouth College starting in the late 1990's, some syllabi are still taught, as well as resources from other projects. Some of these materials may be downloaded directly and others may be obtained by contacting the listed source. Many were developed as part of the Math Across the Curriculum Project at Dartmouth College. This work was supported in part by the National Science Foundation.

The center website can be found here
